NEURO FRANCE Implants resulted from two abilities : management and design. The company is **specialized in creation and manufacture of implants and instruments for spine surgery since 1998 and for chest surgery since 2012.**

NEURO FRANCE Implants is a dynamic and reactive company and offers innovative and adapted solutions for spine and thorax surgeries.

Our systems are simple to use and efficient. They are designed working closely with spine and thorax specialist surgeons.

Thanks to our solid experience, we design, develop and manufacture our products in France. Then we sell them all over the world thanks to our distribution network.

CONFIRMED EXPERIENCE QUALITY PRODUCTION

Our **biomechanical know-how** combined with our **spine and thorax surgery expertise** allowed us to design **high quality products** according to regulatory and ethical requirement.

Indeed, our systems are mechanically and clinically tested before to be placed on the market.

NEURO France Implants fitted with **high performance and sophisticated equipment** run by our **experienced team.**

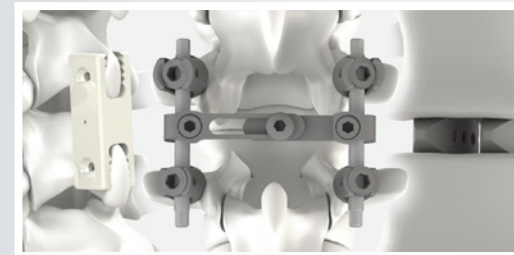

In order to be more reactive, we update regularly our machine park.

Once manufacture process is complete, **we control carefully 100% of the pieces.**

QUALITY PRODUCTS

SUITABLE PRODUCTS

Professional and creative, NEURO France Implants commits itself to propose **adaptable system** allowing surgeons great freedom in their decision making.

Professional and creative, NEURO France Implants commits itself to propose adaptable system allowing surgeons great freedom in their decision making.
